

SHPO Compiling Cobblestones For Nat'l. Register

If you own a cobblestone building, you already know how unique your property is and how interested others are in its history.

The National Register of Historic Places is also interested. In fact, the NY State Office of Historic Preservation is looking for cobblestone buildings to be added to the 1992 National Register thematic nomination, "Cobblestone Architecture in New York State."

Nancy Todd, SHPO's National Register representative for the Finger Lakes Region, has prepared a special application package for owners of cobblestone buildings in New York state, including several sample nomination forms and a worksheet designed to walk potential sponsors step-by-step through the nomination process.

If you would like to have your cobblestone home or building included in this new group of nominations, it's not too late and it's much simpler than ever before. Please contact Nancy Todd at (518) 237-8643 (ext. 262) for an application package. Packages can also be obtained from Cynthia Howk at the Landmark Society.
